Course ref: LPDP/1904/02

Surviving in the CyberWar & Data Analytics

Course Outline:

Data Analytics

As the business landscape for all organizations becomes increasingly technology-driven as well as uncertain and complex, organizations need to develop deeper understanding of the environment they operate in, in order to survive and thrive. Businesses should make better use of the wealth of information and data they have, in order to identify trends, patterns and any anomalous practices that may exist. This applies to companies' internal audit functions which have a major opportunity to add value to their boards and management through more effective data analysis.

Mr. Michael Au, Associate Director, Deloitte Risk Advisory

Michael has over ten years of professional experience and specializes in providing services in operational review, internal audit and corporate governance advisory. Michael’s clients include government bodies, listed and multi-national companies, covering a wide spectrum of industries including public sector, telecommunication, retail & trading, real estate and manufacturing. Michael has led a large number of internal audit assignments in the past few years. Prior to joining the Deloitte’s Risk Advisory practice, Michael was with Deloitte’s Assurance & Advisory practice in Hong Kong where he performed and led a wide range of financial audit engagements.

Ms. Kelly Chong, Deloitte Risk Advisory

Kelly is a Manager in the Risk Advisory practice of Deloitte Hong Kong with over six years of professional experience in both risk advisory and financial audit. She has performed and led a wide range of internal audit and risk assessment services, US Sarbanes-Oxley reviews, and internal controls due diligence reviews for listing purposes. Kelly has experience in performing data analytics embedded internal audit services, providing data-driven insights and recommendations to enhance organizations' operational-level internal controls.

Surviving in the CyberWar & Data Analytics

Course Outline:

Surviving in the CyberWar
The objective of this training is to raise cybersecurity awareness among the employees within an organization, and how employees can become the most effective defense against phishing attack. The training will also involve real case sharing, and a live demo to show how a hacker can easily connect to your computer once you have clicked on the suspicious link, and what they can do. In the end of the training, there will be a Q&A session and an interactive quiz to assess what they have learnt during the training.

Mr. Lin Tak Chi, Associate Director, Deloitte Risk Advisory
Chi is an Associate Director in the Risk Advisory department of Deloitte China, specializing in technology risk and cybersecurity. He has over 13 years of experience in the information system industry, helping organizations from different sectors on system audit, security awareness training, regulatory compliance, cybersecurity assessment and data loss prevention. Prior to joining Deloitte, Chi was a software engineer of an IT consultancy firms in Ireland and Hong Kong. He had involved in several large-scale projects, include a development of an innovative solution for an award winning hotel, enabling the concept of paperless check-in to streamline the overall operations for the hotel.
